ISRAELI Assassins

Senior Hamas Leader Killed In Dubai

1/29/2010 6:26 AM ET

(RTTNews) - Hardline Palestinian militant group Hamas Friday alleged that one of its senior military commanders had been killed by Israel in Dubai.

According to Hamas, Mahmoud al-Mabhouh (50), a founder-member of the Izz al-Din Qassam Brigades, died a "martyr" on January 20 under suspicious circumstances in Dubai.

The Palestinian group did not give any further details, but vowed to avenge the killing which it called a Zionist crime. "Mabhouh died a martyr in Dubai on January 20, 2010 in suspicious circumstances that require an inquiry in co-operation with the United Arab Emirates authorities," Hamas said in a statement.

Pictures Prove Mini Nukes Caused 9-11 Devastation	

There are only two events known to cause ground-hugging pyroclastic flows (pictured above).

1. A volcanic eruption
2. A thermo nuclear detonation

by "Dennis"

All research provided by:

www.drjudywood.com and <http://911u.org/>

On the morning of September 11th, 2001, we were told a fairy tale. That wide body jets flew into the [twin towers](#) and completely destroyed them. Let me repeat that: Passenger planes (large hollow aluminum tubes) flew into

industrial steel, [marble](#) and concrete sky scrapers, and caused them to turn into a pile of dust. And the worst part about this fairy tale is that we, the American people believed it. Now, nine years later, it's time to wake up from your slumber and take a good hard look at what did and did not happen on that fateful day. The conventional explanation we were provided, by government and [media](#), for a top-down highly destructive gravitational collapse, in near-free-fall times, is physically impossible, and is thus about as worthy of discussion as is the belief that the [Earth](#) is flat.

FICTION: Passenger jets flew into the [Twin Towers](#), and the burning jet fuel caused them to collapse.

FACT: The Twin Towers did not collapse. They suffered a mid-air pulverization due to an extreme unconventional energy source that caused the initial upward trajectory of so much of the towers' mass during the 'collapses' as (supposedly only) gravity was pulling them down.

FICTION: The burning jet fuel melted all of the steel beams causing the buildings to collapse directly onto their own footprint.

FACT: 80% of each of the towers 50 million ton mass NEVER hit the ground. The steel did not melt, but turned into nano-dust. Pulverization + Molecular Dissociation = Ground Zero [Evidence](#). When matter is elevated to temperatures hotter than the surface of the Sun, molecular dissociation results. Molecular Dissociation (MD) is easy to understand once we realize that there are four (4) states of matter: solid, liquid, gas, and plasma. Just as ice has trouble surviving in water or steam, molecules have trouble surviving in plasma, which is highly energetic (ie, *extremely* hot). When molecules dissociate, they leave behind loose atoms and fragments of molecules. In other words, *extremely* small particles. In this sense, it is correct to think of molecular dissociation as disintegration.

What do these two [pictures](#) have in common? They both represent a highly unconventional destructive release of energy, with temperatures much hotter than the sun.

So once we confirm [evidence of widespread molecular dissociation](#) having occurred at Ground Zero in New York City, we have a very strong indication that only exotic, unconventional weaponry could have released that much extremely — unimaginably — high intensity energy which suddenly appeared just as the towers disintegrated

from top to bottom. This understanding means we cannot blame the highly unconventional Ground Zero devastation on thermite/thermate/super thermate and “controlled demolition” any more than we can blame it on “jet fuel” or “box cutters”.

In a “pancake collapse” the rubble pile should be at least 1/8 of the original building height (12.5%). The actual rubble pile was no more than 2% of the original building height. Both towers went “poof.”

So where did these 110 story tall 50 million ton sky scrapers go?

They were turned into nano-dust and 80% of the “dust” floated off into the atmosphere.

From left to right: A huge steel beam from the south tower falters, turns to “dust” and blows away.

Now that we've scientifically proven that only exotic, unconventional weaponry could have released that much extremely — unimaginably — high intensity energy to cause the pulverization and molecular dissociation of these buildings, let's look at some of the other unexplainable anomalies..

1400 VEHICLES melted NEAR WTC

All of these cars have unexplainable similar damage: Paint gone, instant rusting, and all of their door handles and engine blocks are missing!

A squad car on FDR drive with wilted doors, burned paint, instant rust and no door handles or engine block.

[Strange](#) fires appear to be attracted to the engine blocks, while the gas tanks and nearby paper are not affected.

Buildings a few blocks away, had mysterious holes in the windows, and the front [marble](#) façade is completely gone, but no other damage.

Why doesn't the paper burn?

For months we witnessed trucks coming and going from Ground Zero and the [media](#) told us they were hauling away the steel. What steel? There was very little steel left in the rubble because it had been pulverized into nano-dust. So what were these trucks really hauling back and forth? Dirt! They hauled in dirt, spread it all over Ground Zero, then scooped it up and hauled it away, and this went on for years. Didn't they do that at Chernobyl? Yes they did!

So now you know what didn't cause the buildings to "vanish." Planes, jet fuel and thermite are irrelevant. So what kind of unconventional energy could have caused the Twin Towers to turn to dust? A fissionless fusion thermo nuclear event? Direct Energy Weapons? [HAARP](#)? A scaled up weaponized version of The Hutchison Effect? The investigation continues.....
